

Module #12: Custom Collections

Your own data structure :-

- specific need, can't use an existing class
- can't extend existing class

Make it iterable

```
for (Student s : myRoster) { }
```

Make it generic

```
class Roster <T>
```

```
class Roster
```

```
Student s = myRoster.get(5)
```

```
& not s = (Student) myRoster.get(5)
```
